The Urban Finishes

Knobs shown in Satin Nickel | Lever shown in Polished Chrome | Switch Plate shown in Satin Chrome

INTRODUCTION

M. Marcus Limited was established in 1940 at "Ironmongers Row" East London.

We are owned and managed by three generations of the same family; with seven decades of experience between us we have the skills to combine old world values with latest technologies to create products of exceptional quality and design.

With our recognised capability in the manufacture and design of Solid Brass Door hardware we are also aptly known as "Heritage Brass".

Our latest collection encompasses a wide range of products with a choice of designs, finishes and styles that suit even the most discerning clients. We use only the finest quality materials and highly skilled craftsmen, and bring this all to you with superior customer service.

As specialists in decorative fittings our mission is to offer the homeowner and designer a single source to coordinate different finishes of door and window hardware, electrical switches and sockets, and cabinet hardware.

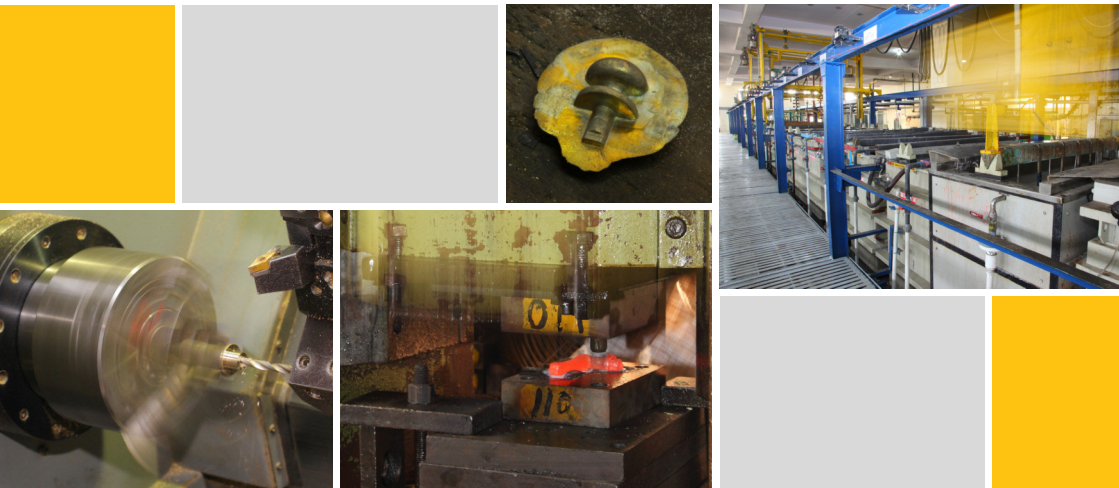

Our products are sure to catch the eye wherever they are used, however the true beauty of our products is in their solid heavy construction, the smooth edges, and the durability of both product and the finish which is only possible with products made in hot forged Solid Brass.

Please take time to review our catalogue, we are confident you will find the right style and finish for your project.

At M. Marcus we believe that being environmentally responsible is part of our job. Over the years, we have implemented various steps to reuse, reduce and recycle materials at every stage in our factory as well as in our office.

Certificate No. EMS 572656
ISO 14001:2004

FREQUENTLY ASKED QUESTIONS

How long have you been in business?

We were established in April 1940.

Are M. Marcus and Heritage Brass the same company?

M. Marcus started selling products under the brand name of Heritage Brass in the 1980's so we are now also known as Heritage Brass.

Are Heritage Brass door handles cast or forged?

All our Heritage Brass door furniture is created using hot forged brass which ensures the best manufacturing process for both strength and superior finish.

How long will the lever handle springs last?

The springs used are crucial to prevent breakages so we source our door furniture springs from a long established Italian manufacturer. Our springs have been cycle tested to provide 100,000 lever operations, and for residential use we offer a 10 year warranty.

Do I need to purchase anything else with my door handles?

Our handles are not supplied with locks, latches or escutcheons. These items need to be purchased separately for the specific function required. Please see lock selector page for guidance.

What door thickness are your levers suitable for?

The spindles we supply as standard with our door furniture will in most cases be suitable for common domestic door thicknesses in the range of 35 to 44mm without having to be cut down. However as door thicknesses may be greater we can supply to special order longer spindles for doors of 50mm and upwards.

Can I fix the lever on rose door handles using woodscrews only, instead of using the bolts supplied?

On levers where both woodscrews and bolts are supplied, we would not recommend fixing with just the woodscrews as the handles will not be secured sufficiently on the door. Always use the bolt though fixings where supplied to securely clamp the handles to the door and only use the woodscrews as an additional means to limit any tendency of the inner roses to rotate once fitted.

Why are our mortice knobs sprung on one side only?

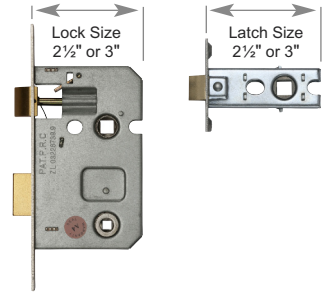

If we were to spring both sides the knob would be very difficult to turn under the combined spring pressure of knob and latch. If we did not spring at all then there may not be sufficient strength in the latch spring alone to pull the knob rotation back again. We have found that springing one side only offers the best compromise for most installations.

Which latches should I use with mortice knobs?

We would recommend using a 3" tubular latch or longer; this allows for a sufficient distance away from the door frame to rotate the knob comfortably. If privacy is required then also fit in conjunction with a 3" bathroom bolt or longer to match the latch size along with a turn & emergency release to operate the bolt.

Do I need to fit a 2½" (64mm) or 3" (76mm) latch or lock?

This will depend on whether replacing an existing lock or fitting a new one. The 2½" or 3" size refers to the depth of the lock measured from the front of the faceplate to the rear of the lock case. Measure your existing lock or latch to determine the correct size required. On a new fitting, when selecting either a 2½" or 3" lock consider how far the lever handles need to be fitted away from the door frame for comfortable operation of the levers.

Does your Antique finish change?

We try to maintain a similar colour and hue to our antique finishes, however due to the nature of the finish there may be slight difference in tone. This is a characteristic of this finish, and so finish matches cannot be guaranteed.

Is the JP finish Gold or Polished Brass?

The JP finish is a combination Gold Plate on Solid Brass and Satin Nickel on Solid Brass.

What is Sorrento?

We produce a range of Zinc Alloy products which are sold as Sorrento and shown in a separate catalogue. We separate the catalogues to avoid confusion between Solid Brass (Heritage Brass) products and Zinc Alloy products (Sorrento).

How long does it take to receive an order?

We only sell via established distributors but we intend to deliver door hardware to our distributors within 1-2 days and electrical accessories in 6 days. If we are out of stock we would normally expect to be back in stock within 4 weeks.

Are your handles suitable for use on fire doors?

The suitability for fire doors is only relevant when using a CE marked mortice latch or lock. All M. Marcus door Levers have been assessed for their suitability of use without affecting the integrity or performance of the doorset on 30 and 60 minute timber based fire doors to BS EN 1634-1: 2000 (Please refer to page 89 for more information).

Warranties for Door Hardware

These warranties are offered in addition to any statutory legal rights for the sale of goods.

M. Marcus will not be liable for any incidental or consequential damages arising from the sale or use of our products. We assume no liability for any labour charges regarding the removal or reinstallation of the products; nor will we cover any carriage costs. Our only obligation will be to replace any defective products.

For terms and conditions of sale please refer to our current retail price list. We reserve the right to amend products & sizes without notice and all dimensions provided are approximate. Colours shown in this catalogue may vary slightly from actual product due to photographic and colour reproduction. All errors and omissions excepted. Antique finished products may have slight variations in tone and colour, this is not a fault but a characteristic of the finish, so finish matches cannot be guaranteed.

10 Year Mechanism Warranty

Sprung sets will be replaced if within 10 years from the date of purchase the spring mechanism breaks due to faulty workmanship or materials. The warranty is made void by any breakage which in the manufacturer's opinion arises from misuse or lack of maintenance. To validate any claim under this warranty a receipt or other proof of the age of the installation may be requested.

Everbrite: 10 Year Finish Warranty

Our 'Everbrite' branded products will be replaced if within 10 years from the date of purchase the decorative finish discolours due to faulty workmanship or materials. This warranty applies only to the original purchaser. The warranty is made void for any discolouration which in the manufacturer's opinion arises from misuse or lack of maintenance. To validate any claim under this warranty a receipt or other proof of the age of the installation may be requested.

Care Instructions

Polished Brass, Antique, Satin Nickel, Jupiter, Mercury and Mayfair are lacquered finishes

The life of lacquered coatings is limited and cannot therefore be guaranteed. There are many factors that can cause a premature deterioration of the lacquer such as the use of metal cleaner or aerosol spray polishes, abrasion of surfaces by rings and keys, sea air, high humidity and exposed locations.

To help maintain lacquer finishes periodically wipe over with a soft non-abrasive cloth moistened with soapy water and then use a dry cloth to buff gently to a shine. For all external fittings wipe over as above and then apply sparingly a good wax polish, to avoid smears buff gently before the wax dries. DO NOT USE Metal Cleaners or aerosol polishes on lacquered surfaces as these will damage the surface. Exterior fittings will also benefit from a periodic light oiling of any springs & moving parts.

Polished Chrome, Satin Chrome, Apollo finish and Everbrite finishes for Door Furniture.

A light dusting with a soft non-abrasive cloth will remove finger marks. A sparingly applied non-abrasive wax polish can be used to remove difficult marks and then buff to a shine, but using too much polish may cause smearing or bloom which can then be difficult to remove.

Black Iron Door Furniture

Periodically wipe interior fittings over with dry soft cloth. For exterior fittings wipe over with a lightly oiled soft cloth to maintain lustre. Exterior fittings will also benefit from a periodic light oiling of any springs & moving parts and this will also help to prevent corrosion. Any iron product is prone to rusting so if the decorative finish shows signs of chipping, remove any loose or flaking material, making sure the surface is dry and grease free, then spot the affected area with enamel paint e.g. "Humbrol" enamel paint or similar.

Warrington Fire Assessment Report

M. Marcus brass lever furniture has been assessed for use on 30 and 60 minute timber based fire doors when fitted in conjunction with a fire tested latch or lock.

FD30/60

To BS 476 : Part 22 : 1987
or BS EN 1634-1 : 2000

This assessment considers the fire resistance performance of single-acting timber based door sets, when fitted with M. Marcus handle furniture. Should the recommendations given in the report be followed the report concludes that previously fire tested (or assessed by warringtonfire) timber door sets which have achieved 30 or 60 minutes integrity in accordance with BS 476 : Part 22 : 1987 or BS EN 1634-1 : 2000 as discussed in the report may be fitted with M. Marcus handle furniture as detailed in Annex A, without detracting from the overall integrity performance (and insulation where relevant) of the door set.

Warranties for Electrical Accessories

These warranties are offered in addition to any statutory legal rights for the sale of goods.

Heritage Brass Electrical Accessories are guaranteed for 5 years (dimmer switches 1 year) provided the following conditions are met.

- 1) The accessory has been properly installed complete with its protective gasket by a qualified electrician in accordance with the wiring regulations current at the time of installation.
- 2) The accessory has been subjected to normal use and has not been altered or dismantled in any way.
