A. Perry & Co. (Hinges) Ltd.

Company History

A PERRY is a family owned and family run company established in 1925 by Arthur Perry. He started out by making steel Gutter Brackets and Hinges in Old Hill in the Black Country.

In 1927 Arthur's son Ernie began to help his father with the business at the age of twelve and still attends work on a daily basis at the age of ninety four. In 1935 Arthur's second son Cliff began working in the business at the age of fourteen.

Over the years the product range began to grow along with our reputation and business. This led to us moving to a new, purpose made premises in Doulton Road, Cradley Heath in 1955 where we still operate from today on a site of over 50,000 square feet of factory, warehouse and offices.

Privately owned and personally run is a trademark characteristic that A.PERRY is very proud to claim. Ten years after this move in 1965, Ernie's son-in-law Alan Dunnaker joined the company. The business continued to grow gradually over the years. Guy Perry joined his father Cliff, along with his uncle in 1981. Shortly afterwards in 1984 Alan's son Brian joined the company and his younger son Ian started in 1995. Following on in the family tradition, Guy's son Chris joined the operation in 2006 ensuring continuous family commitment and personal family attention.

1996 saw the A.PERRY range grow considerably when we purchased the tooling and machinery of Jonah Banks Ltd. from the administrators of JB Hardware. This allowed us to vastly increase our range of products, by introducing many traditional ironmongery products such as Tower Bolts, Brenton Bolts and Handrail Brackets etc.

There was further growth in April 2006 when A.PERRY purchased the stocks and machinery of Glynne Robinson Studding from the administrators of Eliza Tinsley, as well as taking on many of their staff. We are now able to manufacture and supply a huge range of Threaded Bar and related products that cannot be rivalled within the industry.

Over the last few years turnover has more than doubled with continuing growth. A.PERRY now employ over 80 staff, and still manufacture products including all special Threaded Bar. With the demise of many competitors and our continual growth, we are now the largest supplier and manufacturer of Hinges, Ironmongery and Threaded Bar in the UK, supplying customers around the world.

Pushing the A.PERRY brand forwards, our logo was changed in 2007 to incorporate one of our main ethos' - "Always in Stock". With a range of over 5000 products, massive investments in computer systems, premises and logistics we are now able to boast 'Always in Stock' with a promise that any order of standard items received before noon will be despatched the same working day.

Our success is built upon hard work and dedication, as well as offering a quality product at competitive prices backed by an excellent service, with our fifth generation now in place long will it continue.

We offer an extensive range of prepacked products that are packed into strong polythene bags and many are fitted with printed and laminated header cards.

Benefits of All-Pack Hardware include: -

- An extensive range of competitively priced high quality prepacked products
- Our name does not need to appear on any of the packaging
- Strong header cards with Euro slots for excellent visual effects
- Each pack contains all the fixings necessary
- Individually bar-coded for point of sale, with easy to read labels
- Each product is packed in the most compact way to ensure maximum use of space
- Packages and labelling are all attractively designed and printed and are customisable to suit your own individual requirements with your name and/or logo or can be left as our standard design
- Whilst our current listed range is extensive, most products listed in this catalogue can be prepacked to customers requirements given sufficient quantities and are indicated in the blue column on each page

We offer customers the opportunity to stock our range of All-Pack products on our very own display stands. These stands provide an ideal way of displaying your stock to the customer in a tidy and convenient way.

Benefits of All-Pack Stands include: -

- Strong and robust stand for displaying heavy prepacked items
- Clean and tidy product display unit
- Keeps stock in pristine condition at point of sale
- Customisable with the addition of your company or trading name
- Compliments the Threaded Bar stands to create an impressive display

On the header card label you can: -

- Have your name printed
- Have your telephone number
- Promote your website
- Personalised slogan or logo

To find out more about these fantastic stands call our Threaded Bar Team on 01384 414013

Benefits of Threaded Bar Display Stands include: -

- Can be used to display 1m or 3ft lengths of Threaded Bar on your shop floor
- Compliment our Hardware stands perfectly
- Can hold up to 24 different sizes of bar and 24 different prepacked items at the same time
- Could boost sales by increasing the visibility of your stock
- Attract more customers with a professional and organised display
- FREE customised Header Board
- An optional back frame for displaying even more prepacked items

Pre-Packed Nuts & Washers: -

Supplied on a header card, these are the ideal accessory to display on the Threaded Bar stands.

We are able to supply all Pre-Packed goods on custom header cards with your company name, phone number and website or email address ... all free of charge.

We also have available Pre-Packed: -

Threaded Bar Handy Packs
Connectors
Chanel Nuts
Wedge Nuts ... and much more.

To discuss the options available in more detail call our Threaded Bar Team on 01384 414013

Threaded Bar Display Stand Options: -

- **OPTION 1: Merchant Display Stand**

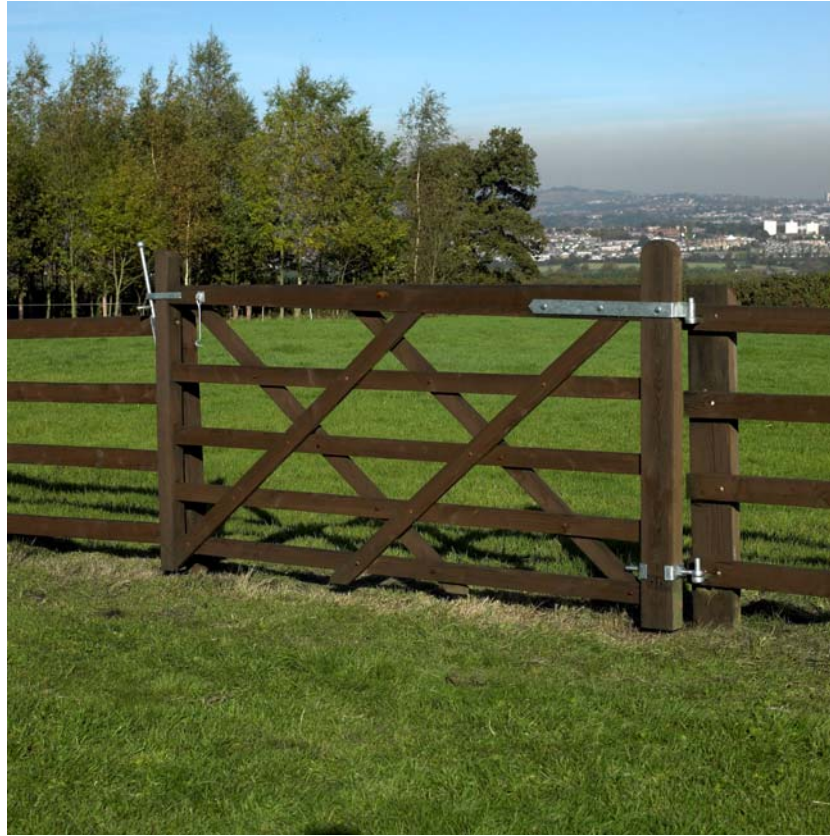

Utilizing each compartment with a different type of Threaded Bar, this option also includes 10 packs of Nuts & Washers to suit each type of Threaded Bar. The colour coded bars and the chart on the front make it easy for the customer to select the correct bar every time. The stand comes complete with 240 packs of Nuts and Washers and 308 lengths of Threaded Bar.

- **OPTION 2: Metric Display Stand**

This option is supplied with 381 lengths of Zinc Plated Threaded Bar and 80 packs of Nuts and Washers. The colour coded bars and chart on the front make it easy for the customer to select the correct bar every time. There is also a further tray underneath for additional storage.

- **OPTION 3: Custom Display Stand**

If you have any specific requirements then please give us a call on 01384 414013 with the details and we will be happy to help in any way we can and provide you with a quotation.

An extensive range of gate hinges and associated products for use on field gates. Also used for the agriculture and building trades.

This section includes: -

- Hooks and Bands
- Reversible Hinges
- Fieldgate Ironwork, Accessories and Specials
- Gate Catches and Latches
- GatePack Hardware sets

An Application Guide for Hook & Band Hinges

Type of Wooden Door or Gate	Usage	Length of Band required
Light Domestic Doors or Wooden Gates	Infrequent	33.3% of width of door
Medium Weight Wooden Doors or Gates, in commercial or industrial use.	Moderate	50% of width of door
Heavy Weight Wooden Doors or Gates, in commercial or industrial use.	Frequent	50% of width of door

Height of Door or Gates
Any wooden door or gate measuring over 2m high but under 3m high must always be fitted with three hinges. When installing doors over 3m high, guidance should be obtained from our Technical Department before fitting.

Technical Advice
Where any abnormally large wooden doors or particularly heavy wooden gates are required to be fitted with Hook & Band type hinges, our Technical Department will provide a free of charge written specification upon request.

No.479 Kitch Catch Stainless Steel with all Fittings

Each

The Kitch Catch is a unique way of enabling two-way and one-way gates to be easily opened from either side and even more importantly easily closed, by anyone. The Kitch Catch is especially useful for disabled people or people pushing wheelchairs, prams etc. and because the gate only needs a gentle push to close it from either direction, people are more likely to 'close the gate' making the countryside a safer place for people to enjoy. The Kitch Catch is particularly suitable for footpaths, parks, playgrounds and gardens and meets all the requirements of the Disability Discrimination Act (D.D.A.).

The Kitch Catch is suitable for all gates and assures easy, safe and reliable opening and closing. The centrally hung gates fitted with the Kitch Catch meet all the requirements of the D.D.A. and when fitted with a Rising Bottom Hinge it also ensures that the gate is always closed. It is safe for use with animals and is ideal where heavily used footpaths meet livestock.

For bridleways, which are also footpaths requiring pedestrian and disabled access, the Kitch Catch and Lifter set combined allows riders and people in wheelchairs equal access to the pathway.

The Kitch Catch is made from Grade 304 Stainless Steel and is supplied complete with all fittings whilst it's design is protected under Patent No.GB2355755.

Simply shuts ...

... from either side ...

... with a gentle push!

No.479L Lifter Extension Set for use with Kitch Catch

Set

The Lifter Extension Set converts the Kitch Catch for use on bridle ways, in livery yards, riding schools and those gates that have heavy horse traffic and also where disabled access is required. Its use negates the requirement of the rider to dismount before opening or closing the gate.

Kitch Catch and Lifter Extension Sets are being used by :-

County Councils, Borough Councils, Forestry Commission, National Trust, National Parks, Country Parks, Riding Schools, Country Walks, Playgrounds, International & Three Day Eventers, Equestrian Establishments, Land Farms and Equine Farms in both the U.S.A. and the U.K. markets.

No.479A One-Way Gate Opening Adapter Kit for Kitch Catch

Set

Whilst the best solution is a two way opening gate fitted with a Kitch Catch, where this is not feasible or where a gate opens out onto a road, this Adapter Kit is available to convert the Kitch Catch for one way gate operation.

Rising Fieldgate Section

 =Sold in split boxes	 =Sold in Full boxes only	Finish	Standard Product	Prepacked Product
---	--	--------	------------------	-------------------

On the No.1816 Short & Long Rising Fieldgate Sets, while appreciating that remarkable results can be obtained by various ways of off-setting Fieldgate Ironwork, we would advise you that when correctly fitted in a perpendicular plane, the theorem used to calculate the maximum rise at the end of the gate is obtained by multiplying the length of the gate by 2, then dividing by the actual distance between the top and bottom hooks. The resultant figure is the rise when the gate is fully open at 90°.

No.1816/S Short Rising Fieldgate Hinge Sets

Set

Each set consists of : 1 x 600mm Standard Fieldgate Band, 1 x Hook to Bolt, 1 x 125mm Short Rising Double Strap Fieldgate Band with one Rocker Plate.

GatePack Section

 =Sold in split boxes	 =Sold in Full boxes only	Finish	Standard Product	Prepacked Product
---	--	--------	------------------	-------------------

We have put together a range of Gatepack Sets which represent excellent value and savings to our customers when compared to buying and stocking the individual components separately. The packs are designed to contain all the required components and fittings to furnish a gate of any kind in a wide range of operations and are prepacked in a poly bag. The sets are based around our four most popular tee hinges - No.121 Medium, No.120 Strong, No.121A Light and No.119 Weighty and we have added a selection of additional items to supplement the tee hinges to create a solution for most gate applications.

In addition to these popular sets assembled for inclusion in our price list, it is possible for us to create bespoke Gatepack Sets to meet specific customer requirements. If you require such a set then please give the Sales Team a call on 01384 414001 for a quote.

Fitting Advice for 'Handed' Hinges

Hanging of 'Handed' Door and Window Hinges

Where hinges are required handed the direction of closing needs to be clearly specified. Based on the International Standards Of recommendations ISO R1226: Part 1, any of the following methods can be used to specify rotation of closing: -

Fitting & Lubrication Instructions for Hinges

When fitting any type of Butt or Backflap hinge having two, three or five knuckles, the leaf with the pin or the greater number of knuck should always be fitted to the frame and not to the actual door.

When hinges are fitted they must immediately be oiled with light machine oil and this lubrication must be repeated at least every months. When environmental conditions are abnormal i.e., high temperature, low humidity, or both, or where the door is subjecte exceptionally heavy usage, lubrication must be increased to at least once every three months to ensure smooth operation and to av excessive wear.

With No.466 Rising Butt, No.467 Falling Butt and No.457 Lift-Off Butt Hinges grease must be used and NOT oil. We recomm "Lithium 3" High Penetration Heavy Mineral Based Grease or equivalent and it must be applied regularly every three months to both pin and the total area of contact between each leaf.

When fitting hinges with screws the correct size screw must always be used, as specified in the price list. The practice of pe hammering the screw into position must not be used, as this will cause internal delamination, which could seriously affect performance of the doors particularly when exposed to fire.

To avoid excessive wear, all hinges should be fitted in precise alignment; failure to correctly align hinges will cause excessive wea occur resulting in ultimate failure of the installation.

Finishes for Exterior Use: - Hot Spelter Galvanized or Sherardized finishes are the only two finishes that we would recommend external use.

No.466 Rising Butt Hinges

Pair

PLEASE NOTE : Rising Butt Hinges must be lubricated frequently whilst in use. Use a "Lithium 3" grease.

CE Certified Fire Door Hinges Section

 =Sold in split boxes	 =Sold in Full boxes only	Finish	Standard Product	Prepacked Product
---	--	--------	------------------	-------------------

The following Mild Steel, Stainless Steel and Solid Brass Butt Hinges are produced under controlled conditions and have all been independently tested and inspected and have been manufactured under the very strict production controls and procedures of the Standard BS.EN.ISO 9001:2000 and CE requirements. They have been Fire Tested and fully comply with the new BS.EN.1634-1:2000 Fire Door Regulations, in conjunction with BS.EN.1363-1:1999 and BS.EN.1363-2:1999. The hinges are also all fully approved to meet all the very stringent New Regulations relating to the essential requirements for all hinges that are fitted in "Timber Fire/Smoke Compartmentation Doors and/or Escape Route Doors", that must be CE Stamped and Certified by the 1st December 2003, in accordance with the EC. Construction Products Directive (amended) 93/68/ECC. Dated 22nd July 1993.

For 30 minute Fire Doors a 1mm thickness of Intumescent Pad should be fitted under each leaf.

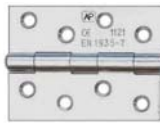

For 60 minute Fire Doors a 2mm thickness of Intumescent Pad should be fitted under each leaf.

Further information regarding the current latest Fire Door Regulations is detailed on back pages of this Price List.

No.CE451MS Mild Steel Fire Door Hinges Grade 7 Pair

These Medium Duty Butt Hinges are made from CS.4 Grade Mild Steel and have passed all the new Regulations and fully conform to the New EC Product Standard BS.EN.1935:2002 - (Grade 7) Product Classification No.27211007, fully meeting all the Regulations and Requirements of the new U.K. Construction Products Regulations for both 30 minute and 60 minute Fire Door Installations and are suitable for Fire Doors having a Maximum Door Weight of 40 Kgs (88 lbs) when fitted with THREE hinges.

Requiring fixing with 1.25" x No.10 Posi-Drive Steel CSK Wood Screws (Not Included).

(Extracts from Table 1 of BS EN 1935: 2002 are reproduced with the kind permission of the British Standards Institute under license number 2003DH0335)

Example of Classification for CE451MS Fire Door Hinge (Grade 7)

2	7	2	1	1	0	0	7
---	---	---	---	---	---	---	---

This denotes a hinge for use in medium duty situations tested to 200,000 cycles, for use on doors with a mass up to 40kg, with approved fire resistance, no specified corrosion resistance, not suitable for use on burglar resistant doors (i.e. No Dog Bolts), and with a hinge grading of 7.

Please Note

The Door Mass / Design Weight has been based on the use of three hinges per door. The efficient functioning of these hinges requires lubrication upon initial installation and thereafter, regular lubrication at the sooner of either 25,000 door cycles or at regular six monthly intervals, taking particular care to remove all of the surplus/excess oil seepage from around the knuckles after each lubrication exercise.

When fitting any type of butt hinge having three or five knuckles, the leaf with the pin or the greater number of knuckles should always be fitted to the doorframe and not the actual door. Should any doubts arise, we would be pleased to offer the services of our Technical Sales Department for guidance and any assistance necessary. (Direct Telephone No. 01384 414001)

Hasps and Staples Section

 =Sold in split boxes	 =Sold in Full boxes only	Finish	Standard Product	Prepacked Product
---	--	--------	------------------	-------------------

We not only offer the largest range of Hasps & Staples, starting with the 2½" HS610 Wire Hasps & Staple increasing to the 36" HS249 Extra Heavy Fixed Pattern and the HS247 Extra Heavy Swivel Pattern, but we also include the most advanced designs for extra security. With features that include the staples being made from high quality heavier gauge steel and then fully welded into the fixing plates for increased security, along with being fully rounded to deter sawing. The hasps are fully riveted both ends to prevent removal. Why buy expensive padlocks and fit them onto lesser quality Hasps & Staples? For the best protection fit Perry's!

No.HS610 Wire Hasps & Staples Each

A multi - purpose product designed for light applications where some degree of security is required.

Quality assured

See chapter for full details of our range

We have one of the most comprehensive ranges of environmentally friendly clothes airers available, complimented by a large range of pulleys, in addition to the pot racks and shelf racks that make the most of spare wall space almost anywhere.

This section includes: -

- Clothes Airers, Kits and accessories
- Pot Racks and Shelf Racks
- Radiator Racks
- Cleat Hooks and other Aired Accessories
- Large range of Pulleys

Clothes Airers Section

 =Sold in split boxes	 =Sold in Full boxes only	Finish	Standard Product	Prepacked Product
---	--	--------	------------------	-------------------

Our traditional clothes airers are made from high quality cast iron and then powder coated to ensure durability. All the sets complete with everything you need for a quick and easy installation. The kits are the same as the complete sets but without the wooden laths.

In addition to the standard sets and kits that are laid out in this book we also offer a number of upgrades accessories and spare parts should you need them, these include an upgrade from a Nylon Wheel Pulleys to Cast Wheel Pulleys or an additional double pulley can be used to extend the rope, allowing the rope to run down the wall or further along the ceiling.

CARE AND MAINTENANCE OF BRASS PRODUCTS

All brass products supplied by A. Perry & Co. (Hinges) Ltd, are of the very best quality and have been treated with a hard wearing lacquered finish. It is IMPERATIVE that under no circumstances whatsoever, should any of these products be treated with a metal polish or any form of abrasive cleaner, otherwise the lacquer coating will become damaged, resulting in marking and early discolouration.

Products used INTERNALLY merely require regular dusting with a soft cloth, supplemented by occasional wiping with a damp cloth having been immersed in warm soapy water and then buffed afterwards with a dry soft cloth.

Products used EXTERNALLY should be treated all as above, but it is advisable to apply a thin coating of a good natural wax polish once a week, to keep the finish in a good condition.

After prolonged exposure to the external elements, the lacquered finish may break down due to varying adverse atmospheric conditions. Should this occur, any remaining trace of the lacquered finish can be removed by the gentle and careful application of a mild acetone based cleaner, applied strictly in accordance with the manufactures instructions. The brass product will then be in a suitable condition for cleaning and polishing, all as previously described above, but with the added application of a suitable good quality none abrasive metal polish or cleaner.

Traditional products for decades

At APerry we are still a British Manufacturer and now offer the largest range of threaded bar and associated products on the U.K. market at very competitive prices.

Our manufacturing capabilities include: -

- Cropping and rolling service so our customers can order any required length of threaded bar in Metric dia. 6mm to 24mm and ¼" to 1" in Whitworth
- Mild steel: 3mm to 48mm dia. and 3/16" to 1.1/2" dia.
- High Tensile Steel - Grade 8.8: 6mm to 42mm
- High Tensile Steel - Grade 5.6 (EN8): 1/4" to 1" dia. BSW
- Stainless Steel in A2 (Grade 304) & A4 (Grade 316): 3mm to 24mm dia.
- Solid Brass - Grade CZ121: 6mm to 16mm dia.
- Threads available: Metric, BSW, UNC, BSF and UNF as well as Left-Hand thread
- Threaded Rolled Steel Tie Bars
- Fixings: - Various Nuts (inc. Left Hand Thread), Bolts, Washers and Connectors to suit all your threaded bar requirements
- Finishes: Self Colour, Bright Zinc Plated (Electro Galvanized) CR3 Trivalent, Hot Dipped / Spelter Galvanized, BZP-Yellow Passivated and Sherardized.

4.8 Mild Steel Section

Whether you require a Metric, Whitworth, UNC, BSF or UNF thread in 4.8 Mild Steel, 8.8 High Tensile Steel, 5.6 High Tensile Steel, Stainless Steel or Brass then we have the Threaded Bar to suit your needs

We even do Left Hand Thread!

Complete your order by adding from our range of Nuts & Washers to match.

Take a look at the Threaded Bar chapter in this book or visit our website www.threadedbar.co.uk for further details

Door Hinges to BS7352: 1990

Perry's Butt Hinges are manufactured and have been fully tested to conform to BS7352: 1990 (Performance of Metal Hinges for Side Hanging Applications.) in the classifications shown wherever possible. For advice or technical information on any hinge not classified our Technical Department will be pleased to assist and offer advice as applicable.

To find the class of hinge required first establish the total weight of the door and the maximum annual number of cycles the door will be required to open. Then look up the class needed to meet these requirements in the table below.

BS7352:1990 Classification of Hinges

Class	Maximum Weight of Door (Kgs)	Maximum Annual Number
1	10 (22 lbs)	5,000
2	20 (44 lbs)	5,000
3	20 (44 lbs)	25,000
4	40 (88 lbs)	25,000
5	40 (88 lbs)	200,000
6	40 (88 lbs)	500,000
7	60 (132 lbs)	500,000
8	80 (176 lbs)	200,000
9	120 (264 lbs)	200,000

Please Note: -

The design weights are based on three hinges per door being fitted; if 2 hinges per door are fitted then the design weight should be reduced by one third.

When "None-Back Check" Door Closers are fitted it is necessary to add 20% to the effective door weight when calculating the classification of the hinge required and double to actual door weight when "Back Check" Door Closers are to be fitted.

Should any doubts arise, we would be pleased to offer the services of our Technical Sales Department for guidance and any assistance necessary.

When fitting any type of Butt or Backflap Hinge having 2, 3 or 5 knuckles, the leaf with the pin or the greater number of knuckles should always be fitted to the doorframe and not the actual door.

Table 10 - Estimated Frequency of Operation of Doors. BS7352:1990

Door Situation - Classifications / Categories	Estimated Number of Operations	
	Daily	Annually
<u>High Frequency Heavy Duty Situations. (Category 3)</u>		
Large departmental store entrance	5000	1500000
Large office building entrance	4000	920000
Cinema or theatre entrance	1300	455000
School entrance	1250	225000
Entrance door to school toilets	1250	225000
City centre shop entrance	1000	300000
Large city bank entrance	1000	250000
School corridor fire door	600	108000
Town bank entrance	500	125000
City centre restaurant entrance	500	150000
Large office corridor fire door	450	104000
Town centre shop entrance	400	120000
Large office or factory toilet door	400	92000
Hospital ward door	350	128000
<u>Medium Frequency Medium Duty Situations. (Category 2)</u>		
School classroom door	80	15000
Office door	75	18000
Store toilet door	60	18000
Dwelling rear or side entrance	15	5400
Dwelling front door	12	4400
<u>Low Frequency Light Duty Situations. (Category 1)</u>		
Dwelling living room communicating doors	30	10800
Dwelling bathroom / toilet door	20	7200
Dwelling cupboard door	12	4300
Dwelling bedroom door	9	3200
Dwelling wardrobe / closet door	6	2200
Dwelling cabinet furniture door	5	1800
