# Patented Adjustable Hinges

**Our unique 3 way adjustable hinge system offers the installer maximum flexibility during the installation process.**

Hinge cradles are secured to the door frame with the corresponding hinge receivers fitted to the door leaf. Installation, or hanging of the door, is then carried out simply by "snapping" the door receivers onto the hinge jamb. Once in place the relative door position can then be adjusted to ensure an optimum fit within the doorframe.

- **Vertical adjustment** – allows the door to be moved up or down +/- 2.5mm
- **Horizontal adjustment** – allows the door to be moved left or right +/- 2.5mm
- **Lateral adjustment** – allows the door to be moved in or out of the doorframe rebate +/- 2.5mm
- **Available to suit:** 44mm & 34mm thick doors.
- **Tested to:** EN1935 CE Marked for FD30 fire doors.

## Euro-Profile & Sever Secure Cylinders

- **BS EN 1303:2005 6 pin Euro Profile Cylinders.**  
Tested to 100,000 cycles, Grade 6.
